

For the NEDA-Stakeholders Chamber for the SDGs

Progress Report

Environmental Working Committee

Q1 2024 Report
3 April 2024

SCOPING PROCESS

Current Progress

Stocktake SDG Contributions and Progress for each Member in Envi WG

Map out what SDGs are being looked into and monitored by each member in the working group, and identify achievement progress

Identify Stakeholders involved in Envi WG Members

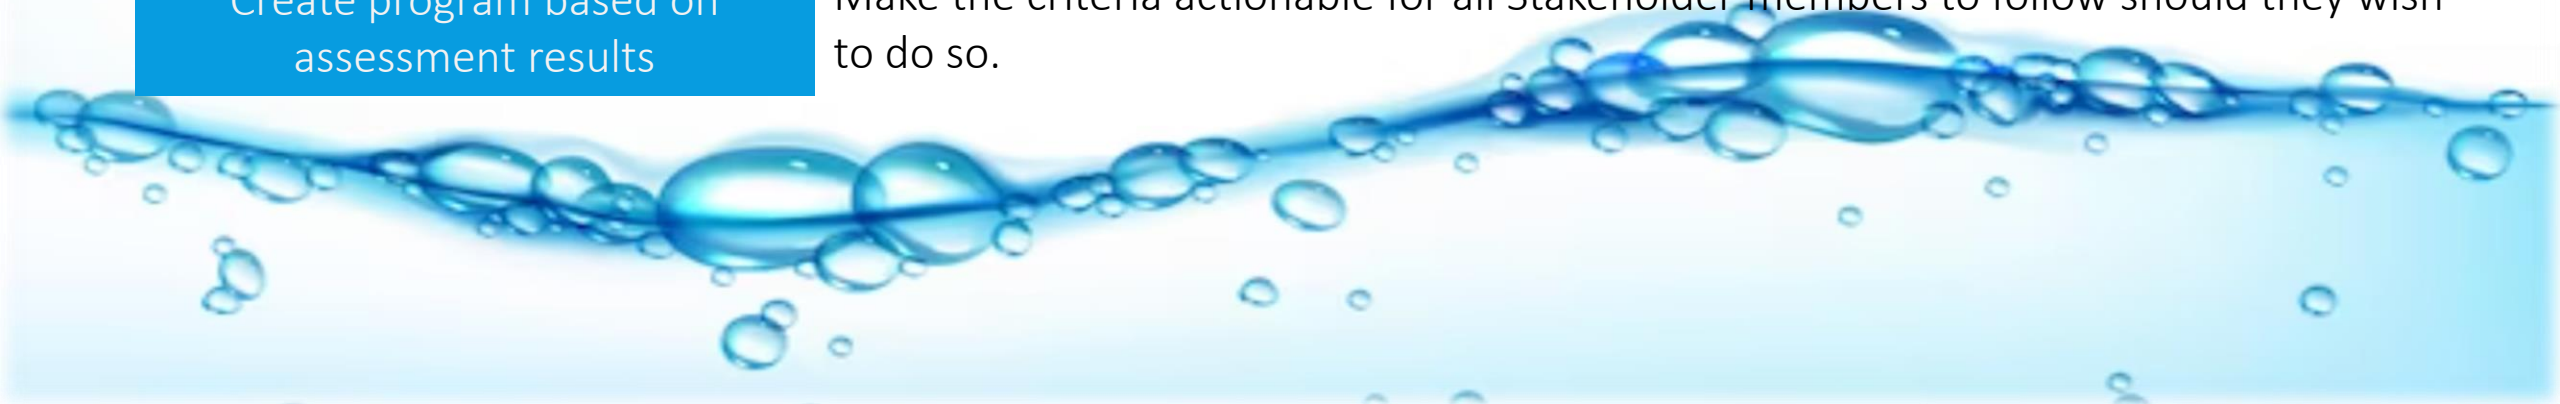

Identify external stakeholders that the WG members have engaged with the past and what resources have been deployed with such stakeholders

Create criteria for assessment of performance to achieving SDG Targets/Indicators

Determine how the WG can work to achieve the SDG Targets/Indicators identified

Create program based on assessment results

Make the criteria actionable for all Stakeholder members to follow should they wish to do so.

Issues to be Addressed

Continued support for strategy formation between WG members

The WG will further engage with members on how to progress further on achieving the agreed direction and make progress through active communication and discussion

Alignment with NEDA Secretariat on Directions

Determine best course of action also with NEDA Secretariat and see through alignment of priorities, such as whether the output would be a policy document or a strategy formation document

Create an engagement mechanism for stakeholders outside the Chamber

Seek out possibilities to meet with other agencies and stakeholders outside the chamber to seek their support for the Envi WG initiatives.
