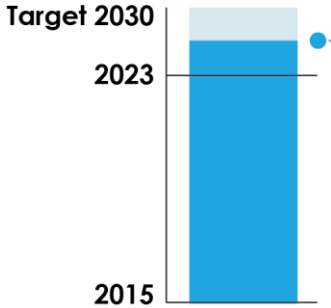
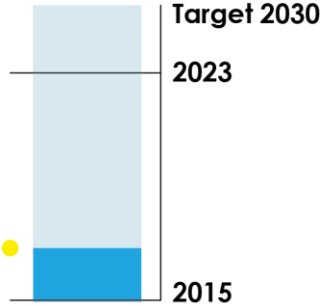
Current Status Index: How much progress has been made since 2015?

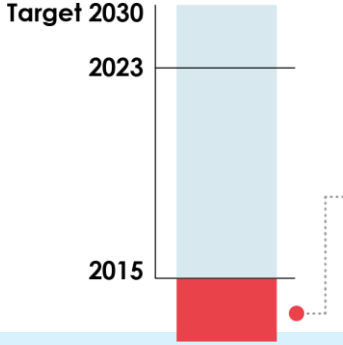
(based on the updated 2030 numerical target and PSA data as of 06 September 2024)



If a bar reaches or crosses the 2023 line, it has made the expected progress to date.

If a bar shows advancement but misses the 2023 line, it has made progress but still short to achieve the expected progress.





If a bar shows progress but towards the opposite direction, it regresses.
